**DATE:** June 2, 1988

All of us have much to do this year but perhaps you could help me out with a special project. Actually it's an unofficial inventory of our existing approved information pamphlets. I'd like your general thoughts on which pamphlets need to be revised, are unacceptable or unnecessary. This would be used as preliminary information for the WLC Revision Committee, in their future work. Don't let my opinion sway you but I feel some of our pamphlets definitely miss the mark. What's important, however, is what you think.

If you can, read these in your spare time, and send in a list (if any) of your general comments, pamphlets you feel are weak etc. One of the questions you can keep in mind to help guide you is "What is the purpose of our literature and do these pamphlets address that?"

**We need all input by September 1, 1988. Thanks for the help.**
